Now, tennis players love playing at night !

«It's full night, the game continues thanks to Tweener Lighting! Quality of light is fantastic it is really uniform over the entire surface of the court. Even high ball lighting is impressive!
Pierre Irisson, Tennis Instructor at Tennis Avenir Sermaises (FRANCE)

«I was very impressed by the ease and speed of installation of the system: 6 hours only to light a court! In addition, playing comfort is there: we can play like daytime!».
Philippe Martin, Director at Tours Tennis Club (FRANCE)
